

Industrial Solutions & Facility Services

[info@ecoifm.com](mailto:info@ecoifm.com)

## Dear My fellow partners

Civilization is rapidly growing, translating into huge amounts of power generation with massive complexity in operating our facilities in efficient and safe way. Bringing efficiency in power consumption and following safety procedures is the most practical way to counter the tremendous change and lack of resources while maintaining the sustainable growth.

Commercial and industrial sectors energy use is substantial share of overall power consumption in the world. EcoIFM is driving high scale transformation to retrofit and operate buildings with energy efficient and intelligent systems that benefits a lot in terms of running cost, life time, flexibility, life safety and much more.

Join us enjoying Efficiency and Sustainability

Industrial Solutions & Facility Services

## Who We Are ?

ECOIFM is MEP experts.

Specialized in Industrial solutions  
and integrated Facility services  
Our firmly believe that we are able  
to add significant value to our  
clients businesses at a strategic  
enterprise level.

A modern, multi-story office building with a white facade and large glass windows. The building features several green terraces with small trees and plants. The sky is blue with some clouds. The image is framed by a large blue diagonal shape that points towards the center.

## Our Vision

Create a sustainable business by delivering consistently great customer experiences.

Industrial Solutions & Facility Services

## Our Mission

We will focus relentlessly on solving our customer's facilities-related challenges, acting as a trusted partner and advisor to ensure fulfilling customers' requirements with optimum solutions and minimum running cost.

## Our Values

- Customer Focus

We have close, open relationships with our customers that generate trust and partnership for the mutual benefit of our organizations.

- Expertise

We develop and demonstrate our expertise through our innovative approach to create and deliver the right solution.

- Performance

We strive to improve performance year-on-year to create long term sustainability.

- Best people

We employ best team, develop their competence, provide opportunity and inspire them to apply our values.

- Integrity first

We can always be trusted to do the right thing.

- Teamwork and Collaboration

We collaborate for the benefit of our customers.

## Our Team

Our core strength is our team's capabilities and discipline.

At ECOIFM, we have several dedicated teams utilizing the highest quality equipment and industry standard techniques to bring you the optimum & efficient solutions as well as well-maintained facility that will exceed your expectations.

We have the expertise of energy auditing and facilities management to properly analyze, upgrade, and repair your building's systems to ensure they are safe, effective, and efficient for you, your customers, and your employees.

We are Experts in designing, installation, retrofit, operation and maintenance of all kind of electromechanical systems.

The diversity of our services in addition to the variety of our FM programs always ensure our sustainable growth and build long-term partnership with our customers.

## Our Service

ECOIFM is MEP experts and relies on an integrated approach in close collaboration with the customer.

Technical, infrastructural and commercial facility management as well as contracting, installation, startup & commissioning, Supervision, energy auditing and consulting services are combined in a targeted manner to allow for the greatest possible value creation for the client

**We believe that no task is too small and no challenge is too exotic**

## Industrial & Process Cooling

Industrial sector is always having complex properties. Many primary and secondary processes with extensive interactions are in play here. Today, in our world of globalized competition, a company must invest everything it has in the quality of its products and, thus, in its core competences.

To ensure that the production-related processes can withstand this focus, Process cooling, Ventilation and Air-conditioning become mandatory for most of the industries, that requires experts to do the professional inspection and load calculations as well as design and provide the suitable system to the process. ECOIFM provides its support as a value-adding partner.

- Design and deliver the right solutions
- Load calculation
- Supply and install industrial chillers and process cooling
- Contracting and retrofit
- Operation & Maintenance

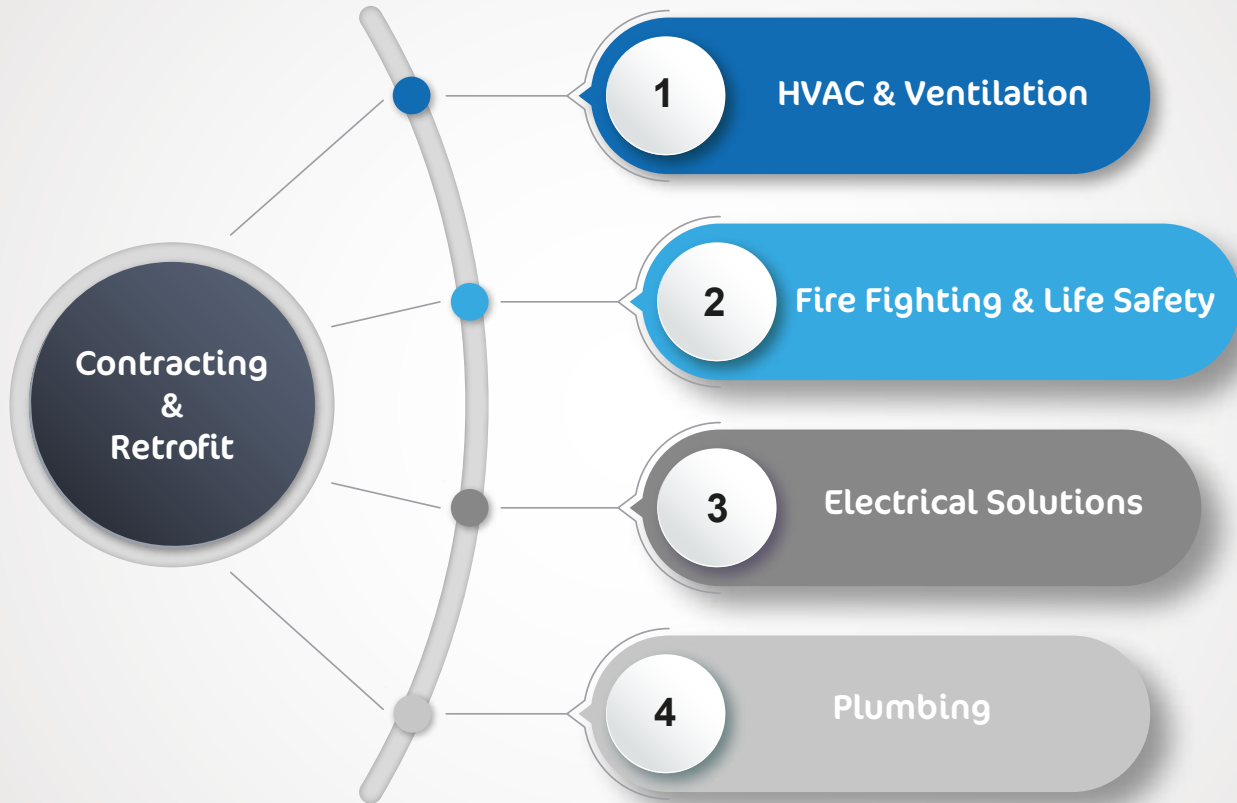

Wide range of products and systems under our umbrella to deliver the most efficient solution with flexible monitoring and control

## Contracting & Retrofit

High expertise in all MEP contracting and retrofit, From sprinkler systems to HVAC equipment and more, our experienced teams ensure your fundamental systems are properly installed, updated to code and functioning properly with engineering and energy best practices in mind

## HVAC & Ventilation

Wide experience in all kinds of Ventilation and HVAC Systems (Chillers, VRF, DX, AHUs, FCUs..etc) that offers first-rate installation and O&M services. Agents and distributors for various multinational brands that offers flexibility to fulfil customers' needs. Our team have the knowledge and experience to provide the high-quality, attentive HVAC O&M you need.

We take care of all necessary preventative measures and replacing the required consumable parts per the approved programs, as well as A/C and heating repairs when needed.

## Fire Fighting & Life Safety

The safety of our customers is top priority.

We provide life safety audit services and offer plan of actions and recommendations for areas that may need fire safety improvement to ensure your building is up to code and meets the necessary fire regulations.

Our NFPA certified and experienced teams do a thorough audit of your premises, inspecting fire extinguishers, building materials, sprinkler systems, and more.

## Electrical Solutions

Your industry relies on your electricity. We provide the optimum electrical solutions, using top quality instruments/component with first class installation and service.

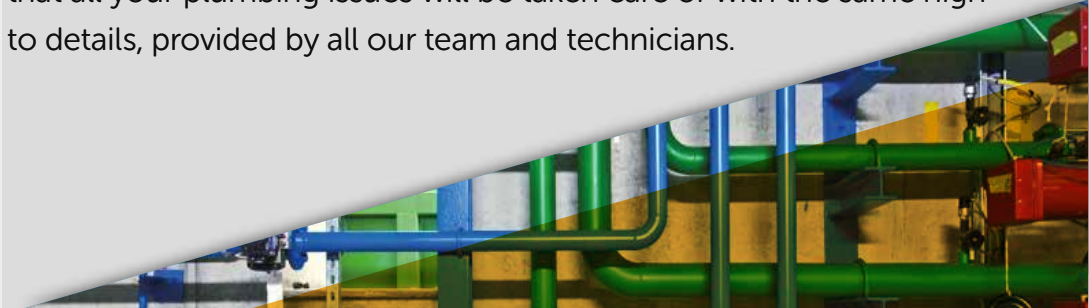

When you experience an electrical failure or outage it can halt production, cause data loss, and could result in the loss of profits.

Our licensed electricians are available, bringing you electrical repair solutions as well as measuring and improving your power quality that will leverage your facility.

## Plumbing

All our plumbing services are performed by licensed, certified professionals, ensuring you have high quality, top-of-the-line service for all your needs. With flexible scheduling and prompt service, you have the peace of mind that all your plumbing issues will be taken care of with the same high quality service and attention to details, provided by all our team and technicians.

## Facility Management and Operation & Maintenance

- The depth and breadth of ECOIFM team experience in Plant Operation & Maintenance (O & M ) is dedicated to implementing professional Key Performance Indicators (KPIs)
- Operational standards as well as safety procedures are being effectively utilized to plan preventive and corrective maintenance programs for all facilities; HVAC, Plumbing, Fire fighting, ...etc

### Operational Objectives

- Reduce downtime
- Minimize operational expenses
- Extend equipment lifetime
- Automation
- Life Safety

### Operational Methodology

- Identify our customer needs and objectives with the lowest cost and highest quality standards.
- Customize service programs to suite our customer requirements with an eye on the overall picture.
- Guarantee our services

## Energy Auditing

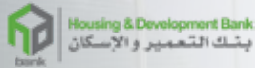

We do care about our costumers running cost and equipment/ systems lifetime our team is highly skilled to inspect your existing systems, evaluate, suggest and implement the right retrofit with guarantee of the annual savings at minimum pay back time we utilize proper systems, technology, know-how, tools and equipment.

We apply strict quality control measures.

Wide range of products and systems under our umbrella to deliver the most efficient solution with flexible monitoring and control.
